KOYOKI MUSIC BOT PRIVACY POLICY

Data Collection Principle

Koyoki strictly adheres to Discord's "Data Minimization" standards. We only collect the minimum data technically necessary for the bot to provide the music and entertainment experience promised to you.

What Data Do We Collect?

Koyoki processes the following basic information to perform its functions:

- **Discord ID Information:** User ID (to determine who gave the command), Server (Guild) ID (to save settings specific to that server), and Voice Channel ID (for the bot to connect to the correct channel).
- **Command Usage Data:** Only which command (e.g., /play, /skip) was used and how often is kept statistically and anonymously.
- **Content Data (Limited):** Your voice search or playback requests are processed instantaneously to search on relevant platforms but are not permanently recorded.

What Data Do We NOT Collect?

- Koyoki does not read or record your private messages (DMs) or conversations in regular text channels.
- Koyoki does not listen to, record, or store your conversations in voice channels in any way. It only provides the audio stream of the music it plays itself.

Use and Sharing of Data

Obtained technical data is used only to fix errors (debug), improve the performance of the bot, and provide the service you request. Your data is not sold, rented, or shared with third parties, institutions, or advertisers in any way.

Data Retention and Deletion

- Server-specific configuration data is kept in our secure databases as long as Koyoki remains on your server.
- When Koyoki is kicked from your server, the specific settings belonging to that server are cleared from our systems in a periodic cycle.
- Users can contact us through our support channels to request the immediate deletion of their data (recorded playlists, etc., if any). Data deletion requests are fulfilled within 30 days at the latest.

Contact

If you have any questions about our privacy practices, your data, or our terms of service, please do not hesitate to contact us via [Link to Our Support Server] or [Your Email Address].
